

On the Double

Our maintenance team has been working hard to keep up with all the innovative, ongoing improvements here at Robinson Nursery. We are excited to share with you a new project that was recently completed. After months of hard work, through the cold of fall and winter, we now have two additional loading docks in our shipping yard.

We were able to do much of the renovation in-house. Digging out the loading docks, building and setting the concrete forms. Our team even installed the railings and new edge mount hydraulic dock-levelers. These are adjustable ramps that allows the conveyor to roll into the truck with ease. To complete the project, a cement truck was hired in; as well as an over head door company. Despite a series of setbacks, our maintenance team did an amazing job managing this project and it was completed just in time for shipping season.

Four loading docks up and running has doubled our shipping capacity; pushing us to work even smarter. The addition of specialized conveyors to the work space allows the shipping crew to maintain fluidity through the high volume of product being sent out. The conveyors are equipped with a remote start/stop as well as a remote hydraulic elevator that quickly and easily allows for height adjustments; saving time when plants need to be loaded high in the truck. The mechanized pace of the conveyors generate consistent loading times, allowing us to reduce man hours, per truck, by 30% .

We are pleased to share that shipping is well under way. We are currently about 40% shipped. We still have plenty of great product available. If you are still waiting for your product to ship, take a look at our availability and see if anything works for you! If you have any questions, do not hesitate to call.

Thank you for choosing Robinson Nursery.
